CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

ABOUT CHORUS MOTORS PLC

Chorus Motors has developed an innovative electric motor technology, called Chorus® Meshcon®. Chorus is an AC induction electric motor/drive offering dramatic improvements in torque, size, weight, and reliability. A multiphase Chorus Meshcon motor can produce five times the startup torque of a same-sized three-phase conventional motor. It is ideal for low-speed overload such as those with start-stop and traction requirements, providing high torque at low speeds without compromising high-speed operation and performance. Initial applications - such as the WheelTug® aircraft electric drive system – will be for aerospace (where power, size, and weight are all critical considerations), and for starter-generators. Chorus is also ideal for powering industrial machinery, cars, trucks, ships, and trains.

The Company's principal focus at present is developing, certifying, and marketing the WheelTug system for commercial aircraft, described more fully below in this report.

FORWARD-LOOKING STATEMENT

The discussion of the Company's business and operations in this report includes in several instances forward-looking statements, which are based upon management's good faith assumptions relating to the financial, market, operating and other relevant environments that will exist and affect the Company's business and operations in the future. All technical, scientific, and commercial statements regarding technologies and their impacts are based on the educated judgment of the Company's technical and scientific staff. No assurance can be made that the assumptions upon which management based its forward-looking statements will prove to be correct, or that the Company's business and operations will be unaffected in any substantial manner by other factors not currently foreseeable by management or beyond the Company's control.

All forward-looking statements involve risks and uncertainty. The Company undertakes no obligation to publicly release the result of any revisions to these forward-looking statements that might be made to reflect the events or circumstances after the date hereof, or to reflect the occurrence of unanticipated events; including those described in this report, and such statements shall be deemed in the future to be modified in their entirety by the Company's public pronouncements, including those contained in all future reports and other documents filed by the Company with the relevant Securities Commission.

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

DIRECTORS' REPORT

The directors submit their report and the audited financial statements for the year ended 31 March 2015.

Corporate Profile

The Company was incorporated on 18 March 1999 in Gibraltar. The Company's shares were publicly traded in the United States over-the-counter (OTC) market for many years and quoted as CHOMF on the Pink Sheets at www.pinksheets.com. We are seeking other trading venues for Chorus Motor plc. It is a majority-owned subsidiary of Borealis Exploration Limited (PRG: BOREY; US OTC: BOREF).

Activities

The principal activity of the Company is that of researching, developing, building, and marketing the Chorus Meshcon technology for a range of commercial and industrial applications, the principal one of which at present is for the WheelTug aircraft electric drive system. Chorus Motors plc currently owns 5,709,812 shares, or 82.28% of WheelTug plc, its majority-owned subsidiary developing WheelTug.

Results and Review of Business

The results for the year ended 31 March 2015 are shown on page 10. The directors do not recommend the payment of a dividend (2014: nil) and consequently the profit for the financial year has been added to the reserves.

Our subsidiary company WheelTug plc made major strides in fiscal 2015 toward completing development of and preparing for regulatory certification for its transformative technology for the aviation industry. While most of the year's efforts were focused on the highly complex task of engineering and developing a radically new technology, we also demonstrated the intense interest in the product among airlines. As of the date of this report, 22 airlines worldwide have reserved delivery positions for WheelTug systems for 976 Boeing 737 and Airbus A320 aircraft, the initial versions being developed. This represents approximately 10% of all 737 and 320 model aircraft flying today.

The WheelTug project began in 2004, when The Boeing Company proposed to a joint test project to determine whether something the aerospace industry had never before been able to achieve was possible: whether an electric motor, designed to fit within the small nosegear wheels of an aircraft, could produce sufficient torque to drive an airplane, and thus enable forward and backward mobility at airports, without using either jet engines or a tow tug. The tests, conducted on a Boeing 767 in the summer of 2005 using Chorus MeshconTM motors, were successful. We then launched a multiyear effort to develop, certify, and market the WheelTug aircraft electric drive system.

WheelTug is the first available technology that enables most commercial and military aircraft to taxi around airports without using their main engines and without the assistance of tow tugs. The WheelTug system operates using highly-efficient, environmentally friendly, ultra-high-torque Chorus electrical motors. As a result, airlines (and other aircraft operators) will enjoy reduced fuel consumption, reduced engine damage, reduced maintenance costs and improved ground operations with improved schedule efficiencies. A WheelTug installation is comprised of two electric motors installed in the nosegear wheels of an aircraft, a motor drive electronics package and cockpit controls. WheelTug is powered by the aircraft's auxiliary power unit ("APU"). WheelTug can be fitted onto existing and new commercial airplanes, private executive jets, and helicopters, as well as onto military aircraft. WheelTug can also be easily installed and uninstalled on aircraft, which provides flexibility to airlines and aircraft leasing companies.

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

DIRECTORS' REPORT (Continued)

WheelTug offers significant environmental benefits to both airlines and airports, in reduced fuel consumption, reduced emissions (both from aircraft engines and from ground vehicles such as baggage trains which it could make redundant), and reduced noise. *Air Transport World* selected WheelTug as its 2013 ATW Eco-Aviation Technology Award winner, citing that its editors "were most impressed with how WheelTug has developed and placed something on the market that is ahead of the competition, uniquely meets the efficiency needs of airlines, and which uses a business model that truly makes the benefits of the system measurable."

Commercial airlines currently rely on tow tugs for pushback from terminal gates and on jet engines for ground taxiing. WheelTug eliminates the need for a tug and leaves the engines off until the pilot is at the runway and ready for takeoff. Turnaround time will be reduced by replacing the tow tugs with WheelTug, using the aircraft's onboard electricity from the auxiliary power unit to drive the aircraft on the ramp, tarmac and taxiways to and from the gate. After landing, main engines can be turned off and WheelTug can then drive the aircraft from the runway directly to the gate. Actual tests show that WheelTug works in rain, on snow, and in hot, desert-like conditions. The WheelTug Twist™, or using the system to turn an aircraft 90° at the terminal and thus enabling parallel parking, makes for even greater airport efficiencies than originally envisioned. By using two adjoining terminal gates to deplane and board passengers more swiftly, WheelTug enables airlines to reduce turnaround times between flights by as much as 15-20 minutes. We estimate that each one minute saved reduces an airline's costs by around \$100.

We are developing and certifying WheelTug systems initially for the Airbus A320 and Boeing 737NG aircraft families, which are the world's most widely-flown aircraft. Versions for other aircraft models will follow. For a typical 737NG or A320 aircraft, WheelTug is expected to deliver agreed-upon operating cost reductions in excess of \$1 million per airplane per year, and total economic benefits perhaps much larger, subject to its degree of utilization by the particular airline and agreement on savings sources. Along with such financial benefits, there are also expected to be sharp reductions in greenhouse gas emissions, engine noise and safety risks in terminal areas. WheelTug, with the WheelTug Twist enabling parallel parking and dual-gate boarding, is expected to provide the most extensive efficiency improvements in ground handling of aircraft in decades. WheelTug plc's business model is based on leasing the WheelTug system to airlines and to aircraft leasing companies. WheelTug expects to initially lease each system to airlines for approximately 50% of the agreed monthly cash savings of the airlines using WheelTug

During the past year, we completed our roster of supplier partners, and now have supply contracts with companies that design and build all the components of the WheelTug system. Several of these are risk-sharing partners, which are investing their own funds to engineer, develop, certificate, and manufacture parts of the system. They include Parker Aircraft Wheel and Brake, a division of Parker Hannifin Corp., as exclusive supplier of wheels for the for the A320 and 737NG families of aircraft; ICE Corporation (now part of Ultra Electronics), as supplier of the system controls; Gables Engineering for the cockpit controls; Resource Group for the system software; and Co-operative Industries for the system wiring.

We have also been extensively testing components of the system, as well as complete prototype systems, as is required for certification of all aircraft products. Full prototype systems, for example, have been running on dynamometers simulating landings, takeoffs, rainstorms, heavy loads and other conditions. This year we have upgraded our test facilities to be better able to test each individual component as well as the combined systems. This is an important part of our move towards FAA certification. In addition, we have prepared much of the process and procedure documentation that will be required for FAA certification; made progress toward contracting with partners to handle installation, maintenance, and servicing of the systems; and worked with airports and aviation

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

DIRECTORS' REPORT (Continued)

regulators in several countries to develop new operating procedures for WheelTug-equipped aircraft and to optimize the economic and environmental benefits of WheelTug for both our airline customers and the airports they use.

For example, we have assisted a number of airlines (several not yet customers) in studying procedural and structural changes needed at their hub airports to fully utilize and benefit from the WheelTug Twist. In several cases, airlines have happily found that they could implement the Twist at key airports with little or no reconstruction or reconfiguration of their gates, enabling them to capture significant time and cost savings rapidly and with little investment required.

We have also been working with aviation regulators and service providers in several countries to prepare airports for the advent of WheelTug. For example, we regularly present at IATA, ICAO, ACI and other industry conferences heavily attended by airports. WheelTug regularly works with Prague airport, Paris' Charles de Gaulle, Amsterdam's Schiphol, and others. Such efforts, to assist airlines, airports, air traffic controllers and regulators to adapt to and obtain maximum benefits from the WheelTug system will continue for some years as the product becomes available on additional aircraft models and becomes widely used worldwide.

WheelTug now has letters of intent to lease the systems from 22 airlines, including several national "flag carrier" airlines such as Alitalia, KLM Royal Dutch Airlines, El Al Israel Airlines, and India's Jet Airlines. WheelTug plc projects being cash flow positive in the current fiscal year 2016, during which we expect to complete specifications for WheelTug for the Boeing 737-800 or the Airbus A320, and we will make the filings necessary to achieve Federal Aviation Administration ("FAA") certification. WheelTug expects to be profitable within 6-9 months after FAA certification. Going cash flow positive will result from the sale of production slots, a long used revenue generator in aerospace. Profitability is expected to occur after actual deliveries begin and we are generating monthly lease revenue.

Chorus Motors plc is a member of the Borealis Family of Companies and is an indirect majority-owned subsidiary of Borealis Exploration Limited. Like our parent and many of our Family Companies, Chorus Motors plc is incorporated in Gibraltar.

The financial statements have been prepared in accordance with Gibraltar Accounting Standards, with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. As of 31 March 2015, the Company had net assets of US\$40,164,140 (2014 - US\$38,116,565) and to date has relied on the sale portfolio shares of WheelTug plc and of Borealis Exploration Limited which is its indirect ultimate parent company for its funding.

The continued operation and growth of the Company is dependent on its ability to receive continued financial support from its direct and indirect parent companies and/or to develop potential joint venture partners, development partners, or investors. The financial statements do not contain any adjustments that might be necessary if the Company is unable to continue as a going concern.

Dividends

There were no dividends declared during the year. (2014 – \$NIL)

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

DIRECTORS' REPORT (Continued)

Directors and their Interests

The directors who served during the year were as stated on page 2.

The interests of the directors in the shares of the Company in the year were as follows.

	Share held on 31 March 2015	Shares held on 31 March 2014
Rodney T. Cox	51,927	52,031
Isaiah W. Cox	37,885	37,960
Wayne S. Marshall	41,327	41,386
John Klys	14,990	10,000
Peter Vanderwicken	8,334	23,979
Nechama J. Cox	13,874	13,875

Directors' Responsibilities

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year which meet the requirements of the Gibraltar Companies (Accounts) Act 1999 and Gibraltar Companies Act. In addition the Directors have elected to prepare the financial statements in accordance with Gibraltar Accounting Standards.

The financial statements are required by law to give a true and fair view of the state of affairs of the company and the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable Gibraltar Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Gibraltar Companies (Accounts) Act 1999 and Gibraltar Companies Act. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent auditors' report to the members of Chorus Motors Public Limited Company

Report on the financial statements

We have audited the financial statements of Chorus Motors plc for the year ended 31st March 2015 which comprise the profit and loss account, the balance sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Section 182 of the Companies Act and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Directors' responsibilities for the financial statements

The directors are responsible for the preparation and true and fair presentation of these financial statements in accordance with applicable law in Gibraltar and Gibraltar Accounting Standards. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' responsibilities

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

Independent auditors' report to the members of Chorus Motors Public Limited Company - continued

Basis for qualified opinion

The financial statements do not include the Statement of Cash Flows which is required by Gibraltar Financial Reporting Standard No. 1 and by the Companies (Accounts) Act 1999.

Qualified opinion

In our opinion, except for the effects of the matter referred to in the preceding paragraph, the financial statements:

- give a true and fair view, in accordance with Gibraltar Generally Accepted Accounting Practice of the state of the company's affairs as at 31st March 2015 and of the company's loss for the year then ended; and
- have been properly prepared in accordance with the Companies Act and the Companies (Accounts) Act 1999.

Emphasis of matter

Without modifying our opinion, we draw attention to note 1(f) in the notes to the financial statements which highlights the existence of a material uncertainty relating to conditions that may cast doubt about the company's ability to continue as a going concern. The Company had net assets as at 31 March 2015 of \$40,164,140, of which \$34,289,611 represents amount due from related parties which also show signs of going concern issues.

Opinion on other matter prescribed by the Companies Act

In our opinion the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

Except for the failure to include the Statement of Cash Flows, we have nothing to report in respect of the following matters where the Companies Act requires us to report to you if, in our opinion:

- the company has not kept proper accounting records; or
- if information specified by law regarding directors' remuneration and other transactions is not disclosed; or
- we have not received all the information and explanations we require for our audit.

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2015

1. PRINCIPAL ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Gibraltar Generally Accepted Accounting Principles, Gibraltar Accounting Standards and the Gibraltar Companies Act and the Gibraltar (Companies Accounts) Act 1999 (together, 'Gibraltar GAAP').

a. Basis of accounting

The financial statements have been prepared under the historical cost convention and on a going concern basis. These financial statements have been prepared under the historical cost convention applying the Accounting Policies set out below.

b. Revenue

At present the Company is engaged in development of products which have not yet reached the point of generating revenue. Once trading commences, revenue will be recognised. Profit from the sale of WheelTug plc shares is recognised as income.

c. Reporting currency

The Company's financial statements are presented in US dollars, which is the functional currency for operations.

d. Foreign currency translation

Transactions in foreign currency are translated in US Dollars at the exchange rate ruling at the date of the transaction. Any monetary assets or liabilities denominated in foreign currencies are translated into US Dollars at the rate of exchange ruling at the balance sheet date. All translation differences are accounted for in the profit and loss account.

e. Consolidation

In terms of an exemption under Section 8 of the Companies (Consolidated Accounts) Act 1999 consolidated accounts are not presented since the accounts of the company and its subsidiaries are consolidated in the accounts of the ultimate parent company.

f. Going Concern

In order to meet future expenditures and cover administrative costs, the Company may need to raise additional financing. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favourable to the Company. These financial statements have been prepared on a going concern basis that assumes the Company will be able to realise its assets and discharge its liabilities in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Further information is set out in the Directors' Report on pages 3 to 7.

g. Taxation

The company is subject to the Gibraltar Tax Act 2010 which requires companies with businesses managed and controlled in Gibraltar, to pay 10% Gibraltar Corporation Tax on profits to the extent that this is accrued in or derived from Gibraltar.

CHORUS MOTORS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 68312

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2015 (Continued)

1. PRINCIPAL ACCOUNTING POLICIES (Continued)

h. Intangible assets - Research and development expenditure

Research costs are expensed in the year in which they are incurred. Development costs are reviewed annually and are expensed if they do not qualify for capitalisation. Development costs that are directly attributable to the design and testing of identifiable and unique products controlled by the Group are capitalised as intangible assets only when the following criteria are met:

- (i) it is technically feasible to complete the product so that it will be available for use;
- (ii) management intends to complete the product and use or sell it;
- (iii) there is an ability to use or sell the product;
- (iv) it can be demonstrated how the product will generate probable future economic benefits;
- (v) adequate technical, financial and other resources to complete the development and to use or sell the product are available; and
- (vi) the expenditure attributable to the product during its development can be measured reliably.

The depreciable amount of an intangible asset with a finite useful life will be distributed on a systematic basis over its useful life. Capitalised development costs are amortised on a straight line basis over their twenty year useful estimated life once the asset is available for use.

i. Investment and provisions for impairment

Investments comprises subsidiary undertakings and are stated at cost, less any provisions for impairment, where the recoverable amount of the investments are considered to be less than cost.

The recoverable amount is reviewed at each balance sheet date to determine if there are any indicators of impairment. If such indicators exist then the recoverable amount is estimated. Impairment losses are recognised in the profit and loss account.

2. INTANGIBLE ASSETS – DEVELOPMENT COSTS

At 31 March 2015	<u>\$ 66,900</u>	<u>\$ 13,253,869</u>	<u>\$ 26,843,371</u>	<u>\$ 40,164,140</u>

7. DEVELOPMENT EXPENSE

During the year ended 31 March 2015, the Company was charged by the Holding Company \$1,213,883 (2014 - \$1,512,484) for development and marketing expenses. In terms of note 2 above, development charges of \$565,964 (2014 - \$926,273) have been capitalised as they have met all the criteria in accounting policy 1(h).

8. RELATED PARTY TRANSACTIONS

In addition to related party transactions disclosed elsewhere in these financial statements, during the year ended 31 March 2015, the Company was charged \$174,448 (2014 - \$177,693) in fees for administrative services provided by the ultimate Parent Company.

9. CONTROLLING PARTY

The ultimate controlling party is Borealis Exploration Limited, a company incorporated in Gibraltar whose registered office is Suite 1, 43 Main Street, Gibraltar.

The immediate controlling party is Borealis Technical, a majority owned company by Borealis Exploration Limited.

10. STATEMENT OF CASH FLOWS

The financial statements do not include the Statement of Cash Flows which is required by Gibraltar Financial Reporting Standard No. 1 and by the Companies (Accounts) Act 1999. This represents a departure from Gibraltar Generally Accepted Accounting Practice. The statement has been omitted as the consolidated financial statements of the Family contain consolidated statement of cash flows. It is noted that the company does not have a bank account.
